

WOMB TO TOOTH : A REGENERATIVE JOURNEY

HAM VS OTHERS

Anti inflammatory cells such as IL 1, IL- 10, IL – 2, receptor antagonist and MMP'S

Blood clot – instability and difficulties in invoking bleeding and hemostasis

Anti microbial, decreased pain, anti scaring,

PRP – Comparatively expensive
PRF – Special equipment and reagents required

Reservoir of stem cells which enhances the healing process

Decellularized extracellular matrix – time consuming

Human Amniotic Membrane extracellular matrix scaffold for dental pulp regeneration. Int Endod J 2022; 55: 374-390
