

THE PATHWAY TO HEALING: THE MANAGEMENT OF OPEN APEX

The management of an open apex in endodontics involves addressing incomplete root formation to the apical region. Treatment options including apexification, apical barrier formation, and regenerative procedures.

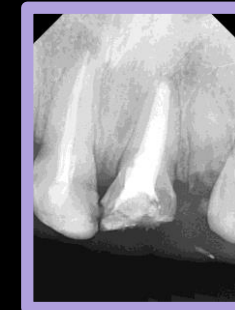

APEXOGENESIS
USING PRF
AND MTA

APEXIFICATION
USING ROLLED
GUTTA PERCHA

APEXIFICATION
USING
THERMOPLASTIC
GUTTA PERCHA

APEXIFICATION
USING
BIODENTINE
PLUG

CONCLUSION-The management of an open apex requires a comprehensive and individualized approach, combining diagnostic precision with advanced treatment techniques.
